

# EVAPORATIVE MEDIA

Quality in the design and construction of our Custom Air Handlers is essential to ensure performance and efficiency as well as the selection of each and every component used to deliver a great product.

As many factors should be considered when choosing the right air handler unit for you, such as environment and region of installation, **Alliance Air Products** offers you the best option in evaporative media technology.

Alliance Air Products has partnered with **Kuul Evolution™ evaporative media**, who is a premier line of specialized evaporative

media that provides enhanced cooling performance and reduced pressure drop due to the choice of materials, design process and proprietary manufacturing technique.

**Kuul Evolution** products are engineered to consistently produce the lowest pressure drops of all the evaporative medias on the market. Using **Kuul Eporative Media** will effectively reduce energy consumption and overall cost of operation for your entire system.

### **KUUL EVOLUTION FIREPRO DE™**

**Kuul FirePro DE™** is a technologically advanced drift eliminator that surpasses specifications for drift rates without placing undue stress on cooling fans. It allows for higher velocities, which means air-handling units can be more compact. The design of DE media ensures droplet carry-over is never a problem for your system and cooling pumps may be switched on at maximum system airflows without the risk of water entrainment.

### **KUUL EVOLUTION FIREPRO™ EVAPORATIVE MEDIA**

If you need to adhere to fire codes, look no further than **Kuul FirePro™**. This technology is made of flame retardant, inorganic materials fortified to provide you with the superior strength that is synonymous with **Kuul® Evaporative Media**. **FirePro** is designed to withstand the demands of even the toughest HVAC environment. Due to its unique material composition, FirePro has market-leading water absorption properties and saturation efficiency, which allows the product to rapidly respond to fast start-up conditions and changes in demand.

**FOR MORE INFORMATION, PLEASE CONTACT YOUR LOCAL ALLIANCE AIR PRODUCTS REPRESENTATIVE:**

or AAP directly at: [sales@allianceairproducts.com](mailto:sales@allianceairproducts.com)

### **BENEFITS:**

-  Reduce energy consumption and reduce cost of operation effectively.
-  Fresh air
-  Increase humidity
-  Energy efficient
